STAND UP PADDLEBOARDS

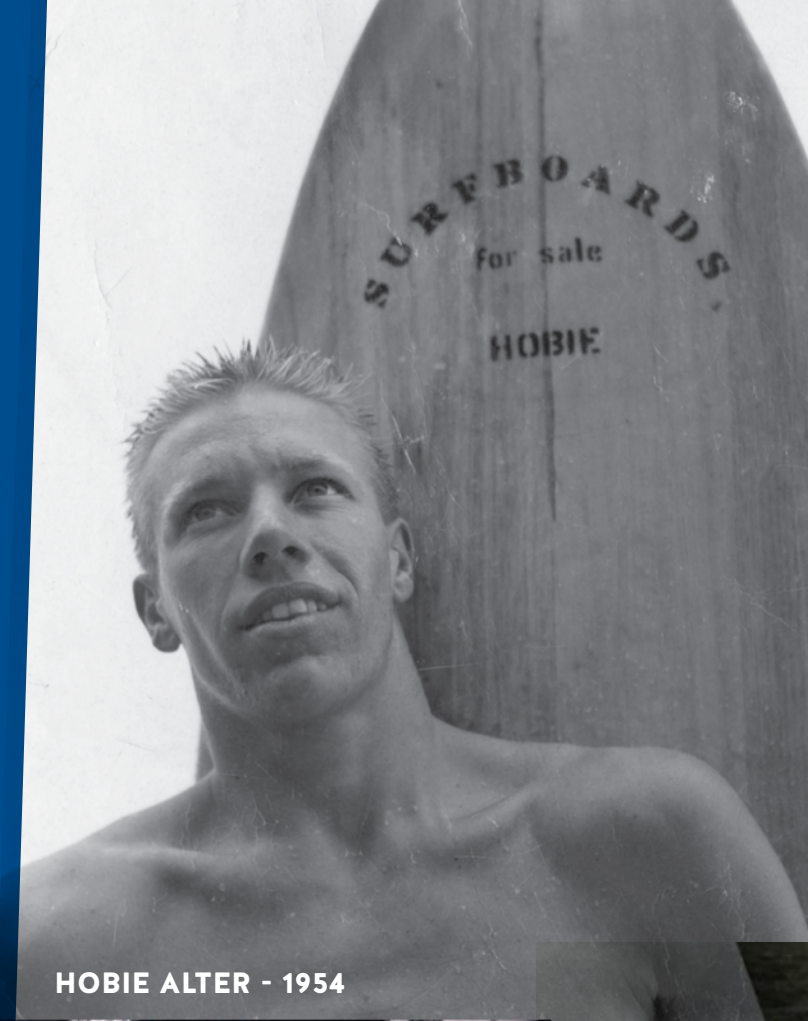

HOBIE INNOVATION

Building high quality, high performance boards is something we have done for over 60 years.

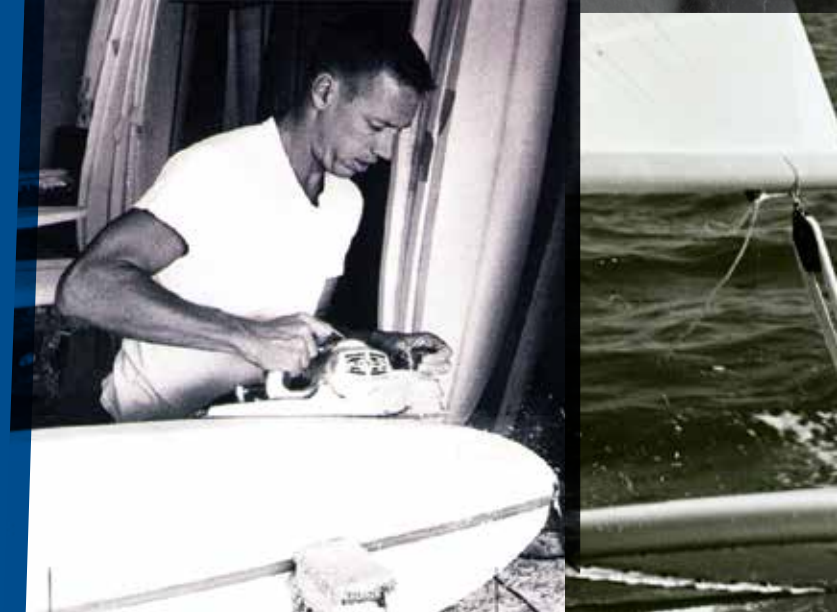

Hobie Alter's genius and innovation has helped shape and change an entire global culture of water sports enthusiasts. From sailing to surfing to kayaking, Hobie Alter's creations have made being on the water easier and more enjoyable.

As an industry leader in board manufacturing since 1950, Hobie has established an innate knowledge of what it takes to make a high quality product and the right combination of materials to do it. With established production facilities in Dana Point, California, Hobie Stand Up Paddleboards has been on the developmental forefront of the stand up paddle industry since its early beginnings in 2006.

Hobie has continued the innovative tradition with our lineup of stand up paddleboards. Utilizing and bringing together proven board and boat building technologies, Hobie has developed a spectrum of stand up paddleboards to fit almost every paddler's needs.

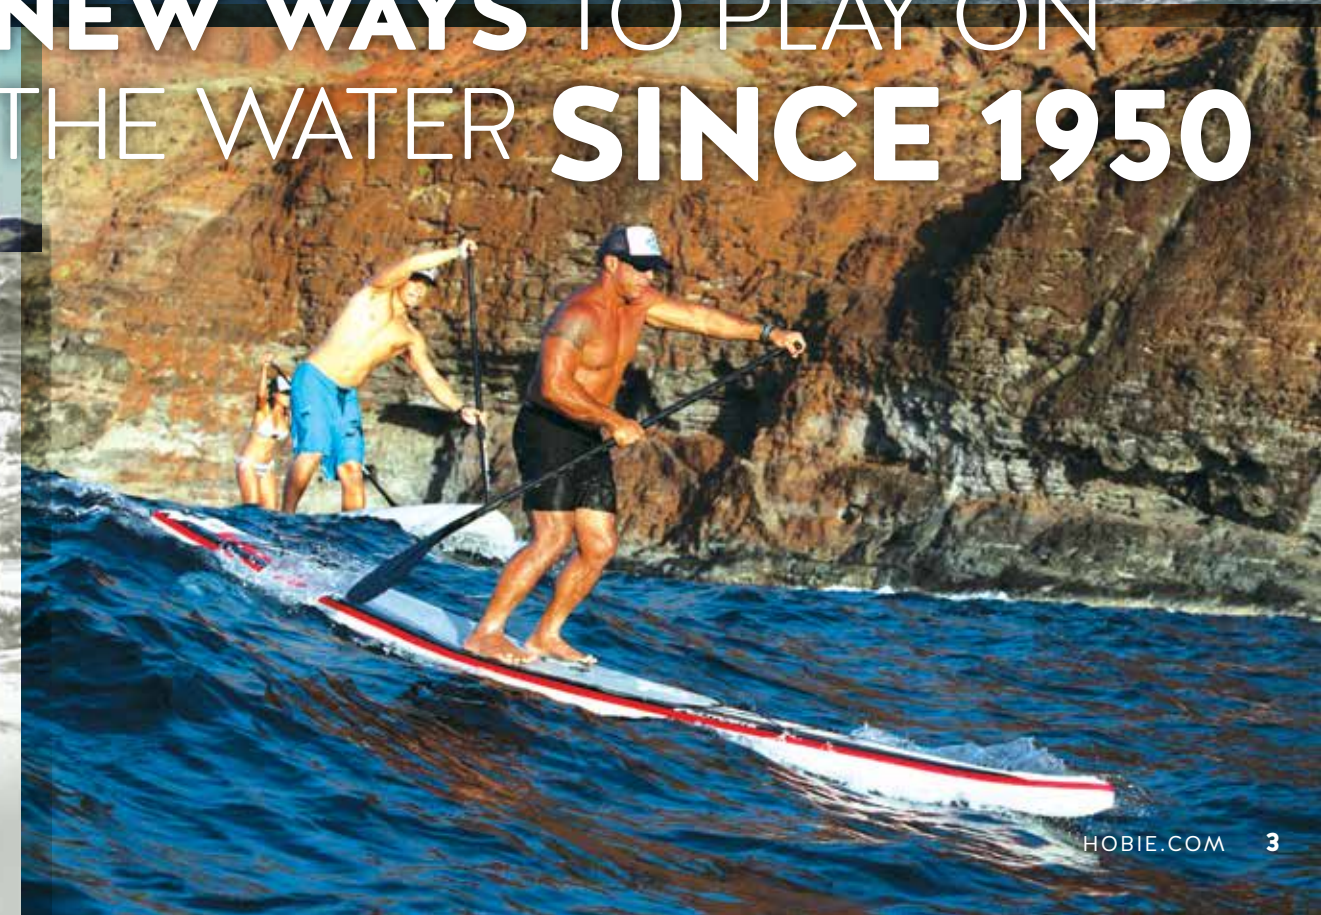

HOBIE ALTER - 1954

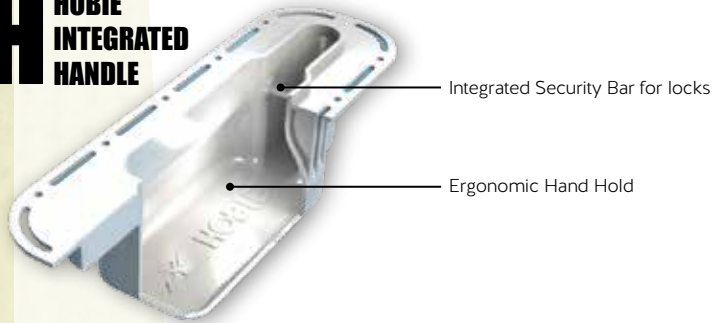

INNOVATING NEW WAYS TO PLAY ON THE WATER SINCE 1950

BOARD TECHNOLOGY

HOBIE INTEGRATED HANDLE

HOBIE INTEGRATED HANDLE

INTEGRATED SECURITY BAR

A high strength, stainless steel bar has been built in to the Hobie handle. This allows the board to be secured using a simple cable lock.

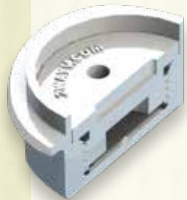

ERGONOMIC HAND HOLD

Contour molded, hand hold designed for easy access and a secure and comfortable grip.

HOBIE 2-WAY V - VENTING SYSTEM

A unique hassle free two-way vent system that equalizes pressure due to temperature or altitude variation.

BOARD CONSTRUCTION

The majority of our methods are molded with the exception of our XHL, XLL, and our custom CLK construction. Molding our boards is very important to Hobie, as it guarantees that the shapes and designs are replicas of our master shapes.

Our gravity laminations are used on our more specialized, high performance and custom models. This lamination technique allows us to produce boards that are cutting edge and continually developing. Many of these shapes and designs eventually will become molded models. This is then paired with the construction we feel the board is best suited for with attention always focused in on **STRENGTH, WEIGHT, PRICE** and most important **PERFORMANCE**.

STRENGTH-WEIGHT-PRICE RATIO (S-W-PR)

Below is our S-W-PR scale that will help you find the board and construction that best meets your needs. All of our boards are very strong and light— most are not over 30 lbs. All fin boxes, handles, hold downs and leash plugs are installed into high density foam for extra strength in all of our molded boards. In all SUP manufacturing there are big variations in strength, weight, price and performance.

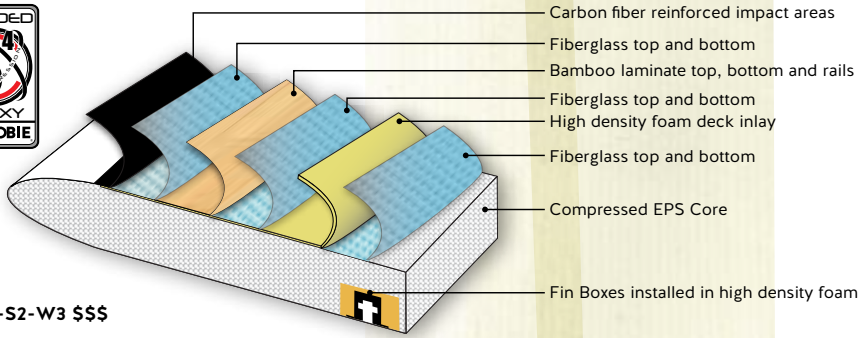

Strength = S1 (Durable) to S5 (Less Durable)

Weight = W1 (Lighter) to W5 (Heavier)

CONSTRUCTION	STRENGTH	WEIGHT	PRICE RANGE
HCX	S4	W3	\$

ATRv3 SERIES

THE ATRv3 SERIES IS DESIGNED FOR ALL OCCASIONS

The next generation of our most popular board series, the ATRv3, showcases the versatility, form, and function that has made it one of the best all-around recreational boards. The ATRv3 Series is available in two lengths and accommodates a variety of paddler sizes and skill levels.

SERIES FEATURES:

BCX4 molded construction, Hobie Handle, 2-Way V Venting System, Leash plug, ¾ length EVA pad, Tie-down points

COLORS:

Dusk Blue, Sunset Red

BCX4-S2-W3 \$\$\$

SPECS:	ATRv3 10-4	ATRv3 11-2
LENGTH	10' 4" / 315 cm	11' 2" / 335 cm

THICKNESS	4.8 in / 12.19 cm	4.8 in / 12.19 cm
VOLUME	182.1 L	201 L
WEIGHT* (*approx. +/- 2 kg)	24 lbs / 10.9 kg	25 lbs / 11.34 kg

EVA-LUTION SERIES

DURABLE, LIGHTWEIGHT, AND PERFORMS IN ALL CONDITIONS

The EVA-lution series takes our most popular and proven molded shapes and incorporates a full length EVA deck into the design. Utilizing full length EVA reduces the cost of manufacturing without compromising performance, and creates a paddling platform that is extremely user friendly and performance oriented. The board is constructed with Hobie's HCX high quality economic molded process. The end result is a board that is lightweight, strong and performs extremely well in all conditions and is priced right for those on a budget.

SERIES FEATURES:

HCX molded construction, Full length EVA pad, Hobie handle, 2-Way V Venting System, Leash plug, Tie-down points

THE EVA-LUTION ADVANTAGE

The EVA-lution features full deck EVA padding providing a 100% fully functional deck area. The advantage is a board perfect for everyday usage under a full spectrum of paddling environments. Providing additional traction when needed, and added durability in vulnerable areas.

CMLB SERIES

Inspired by 3X longboard world champion and all around waterman Colin McPhillips. The CMLB series utilizes Hobie HCX construction that is economical, light weight, strong and molded for a consistent shape that is true to the original master shape. The board has a full outline, flatter deck with full tucked rails for stability. The bottom design begins with concave in the nose transitioning into a nice flat bottom under foot for stability that flows into to a high performance tail with ample vee and double concave for tight loose turning with plenty of drive out of turns. It is a great board for flat water paddling with the added bonus of a great longboard surfing SUP. The cool new resin swirl nose panel connects with Hobie's resin rich surfing history showing our commitment to the craft of building high quality surfboards and SUP's.

SERIES FEATURES:

HCX molded construction, Hobie Handle, 2-Way V Venting System, Leash plug, ¾ length EVA pad

DURA GLIDE SERIES

A fusion of performance, stability and durability, the Dura Glide series is perfect for entry to intermediate paddlers. It features a super stable design with perfect rocker to maximize glide and performance, while utilizing Hobie's DMX construction to maximize durability. A great board series well suited for demo and rental fleets.

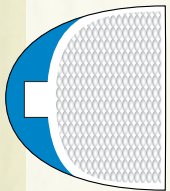

SERIES FEATURES:

DMX molded construction, Full length EVA Pad, Integrated rubber reinforced rails, Hobie Handle, 2-Way V Venting System, Single center fin, Leash plug, Tie-down points

COLORS:

Red, Blue

DURA RAIL REINFORCEMENT

The Dura Glide features an integrated rubber rail reinforcement belt built into the rail, providing a maximum level of protection and maintains overall board performance.

ELITE TOUR

A great all around touring board for long or short distance paddles, and works well in all conditions: up wind, downwind, side chop, etc., the Elite can handle it all. The Elite Tour is one of our most popular and proven board designs, incorporating a piercing bow for clean entry and exit in and out of waves and a single bottom concave under foot for added glide and stability. A slight vee in the tail lets the board go in and out of the surf efficiently. The deck incorporates a slight concave under foot for comfort and lowers your center of gravity for added stability.

SERIES FEATURES:

BCX4 molded construction, Hobie Handle, 2-Way V Venting System, Leash plug, EVA pad, Tie-down points

BCX4- S2-W3 \$\$\$

WEIGHT* (*approx. +/- 2 kg)	32 lbs / 14.5 kg

APEX 4R SERIES

The Apex 4R Series uses our BCX4R molded construction that is light weight, strong and molded for a consistent shape. The 14' comes in two widths to accommodate different sized paddlers and the 12' 6" comes in one width for true racing performance. The combination nose design allows the board to efficiently pierce through waves as well as go over them. The bottom is flat from rail to rail for under foot for stability; flowing to a slight vee bottom for control in and out of the surf. The deck of the board has a step deck design that lowers the paddler's center of gravity for added stability. The Apex design is very versatile, and handles all conditions extremely well. It is stable, fast and a very responsive race board.

SERIES FEATURES:

BCX4R molded construction, Hobie Handle, 2-Way V Venting System, Leash plug, EVA pad, Extra handle attachment points

HEX-LITE SPEED SKIN

Featuring Hex-Lite Speed Skin. A high performance finish providing maximum strength to weight ratio.

HOBIE

STAND UP PADDLEBOARDS

ADVENTURE AWAITS

HOBIE INFLATABLES MAKE STAND UP PADDLING EASY, FUN, AND PORTABLE.

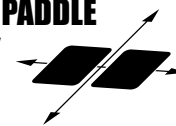

Incorporating many of the same technical design aspects from the rest of the Hobie SUP line, the Hobie Inflatable Series makes stand up paddling easy, fun, and portable. Perfect for families or travelers on the go, the entire Hobie Inflatable Series stores neatly and compact, and can be ready to go in a matter of minutes.

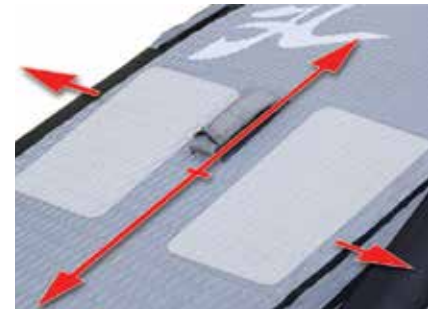

INFLATABLE FEATURES:

- Hi-Tech drop-stitch construction 18TPI
- Inflatable to 15 PSI
- Rigid under foot plates for added board stiffness
- High pressure spring valve for quick and easy inflation and deflation
- ¾ length EVA foot pad provides grip and comfort
- Built in convenient carry handle
- Removable center fin and tri fin, on some models
- Stainless steel D-rings on some models for tying off to boats, docks, etc.
- Bungee® tie-down system, on some models

S₃ STAND UP PADDLE STABILITY SYSTEM

An innovative system developed by Hobie, the S₃ control plates provide additional stability and rigidity in key areas of the board, providing a superior paddling experience yet maintaining optimal portability.

OUTDOOR i SERIES

The main function of the Hobie Sportsman and Day Trip Air is VERSATILITY and ACCESS to remote water. The boards are designed to be stable platforms for a multitude of paddling uses. The boards are a perfect paddling platform for fishing, diving, river trips, great for hiking and camping in remote locations. They are also stable platforms for exercise-yoga, pilates, cross training, etc. Anything you can think of to do on the water, the Sportsman and the Day Trip Air are the perfect boards for the occasion. They paddle great, are extremely stable and very versatile.

SERIES FEATURES:

Triple air chamber TAC- construction, 4" center chamber- 18 treads per square inch inflates to 15 psi for a rigid platform to paddle, The two 6" side chambers inflate to 5 psi for total stability, Multiple D ring hold down points and Bungee cords in front and behind standing area for lashing down cargo, ¾ Length EVA ring for pad comfort while paddling, Reinforced skid plates under outer chambers, 2 plus 1 fins with removable 8.5" center fin, Durable ergonomic backpack carrying bag for storage and easy transportation, Hobie 3-piece stretch paddle, High pressure hand pump with gauge, Repair kit, Lightweight and portable

CORKY CARROLL

Considered the greatest competitor of “California’s Golden Age”, Corky Carroll is a name that is synonymous with the evolution of the modern surfing industry.

A competitive surfer since he was 11, Corky’s flashy yet functional surfing style, along with a sharp wit and infectious charisma landed him surfing’s first paid endorsement deal with Hobie. As surfing’s first official professional, he was the US Men’s champ in 1966, 1967 and 1969, and Overall Champion from 1966 through 1970. A multiple champ of the USSA and WSA in the ‘60s, he placed third in the 1966 World Contest in San Diego, won the International Big Wave Championship in Peru in 1967 and the World Small Wave Championships in Florida in 1968. He won the Surfer Poll Award as the best surfer in the world in 1968, and in 1996 was inducted into the Surfing Hall of Fame.

Corky and his long relationship with Hobie placed him at the forefront of surfboard development. His Hobie Mini Model, introduced in 1967, was the first production shortboard in America, and his Deadly Flying Glove model furthered the evolution. He was one of the first to convert to twin fins in 1971 and was featured in a number of surf films in the ‘60s and ‘70s, including MacGillivray-Freeman’s Five Summer Stories.

Fast forward to 2015, and still a very active surfer, Corky was naturally drawn to SUP Surfing. With a few phone calls to Hobie, the design wheels started to spin, and the CC933 Model was born.

“I designed this to be a performance surfing SUP that can be ridden by anybody, beginner to expert. Being a bit wider than most SUPs it gives an amazing amount of stability to a board only 9’ 3” in length”.

The CC933 features dual bottom concaves in the mid to tail section, along with cutting edge “chine” rails. “This baby will go extremely fast yet turn on a dime. My thinking is that I wanted a SUP that would surf as closely to my prone midsize surfboard as possible, yet give me the flexibility of a full size SUP, the best of both worlds.”

SERIES FEATURES:

Lightweight EPS core, Hobie handle, 2-Way V Venting System, ¾ length EVA pad, 2+1 Fin set up, Futures fin boxes, Leash plug

A PERFORMANCE

SURFING SUP

DESIGNED BY **CORKY CARROLL**

COLIN McPHILLIPS

Since the age of five Colin McPhillips has called the ocean his home and the surf his playground. As a professional surfer, he found success early winning the US Open of Surfing just a year after turning pro. Colin successfully competed all over the world but secured his place in surfing history by winning three ASP World Longboard Titles in 1999, 2001 and 2002.

After 15 years on the pro circuit and a growing family, Colin found himself seeking a new adventure. On advice and some coercion from his dad, Colin gave stand up paddling a try and the rest is history. Colin quickly applied his skills as a surfer to stand up paddleboarding, and found success quickly winning contests. SUP became not just Colin's sport, but his family's sport. He now travels the world with his kids and can be seen competing side by side at events.

As Colin's SUP surfing evolved, so have his boards. Along with Hobie's head board designer, Mark Johnson, the CM Pro and CMLB Comp boards have become some of the best overall performing SUPs available.

SERIES FEATURES:

Lightweight EPS core, ESF weave technology with Technora, Unidirectional carbon stringer, 70/30 flat weave carbon deck patch, Hobie handle, 2-Way V Venting System, 2+1 Fin set up, Futures fin boxes, Leash plug

CM PRO AND **CMLB COMP**
BOARDS HAVE BECOME SOME OF
THE BEST OVERALL PERFORMING
SUPs AVAILABLE

WHERE **CREATIVITY** AND **DESIGN** MEET **INNOVATION** AND **PERFORMANCE**

The Hobie Performance Lab is where we push the boundaries of what is possible. Drawing from decades of board shaping and laminating experience, combine that with modern day material and computer aided design technology. The lab produces some of the highest performing custom boards on the market today.

Each board that is produced in the lab is a handcrafted high performance work of art, that has an identity all its own.

HOBIE CLK LAMINATION

Developed and constructed in the USA, the CLK Lamination technique as it applies to SUPs, has been perfected by the master laminators at our Hobie Glass Shop. It utilizes space age, cross link hybrid laminating technology to produce lightweight, high quality, and high performance stand up paddleboards.

PADDLES

FEATURES

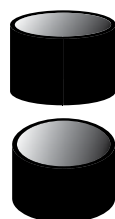

HANDLE

An ergonomically designed handle for maximum comfort and control.
